

Your Foam Cup Recycling Option

The Dart Recycla-Pak program is an easy way for any business to recycle their foam cups. Simply purchase our specially designed foam cup recycling kit and you are ready to begin.

The Recycla-Pak kit includes everything you will need. The collection bin, made with a minimum of 65% recycled content, is shipped to you flat. After a simple assembly, the supplied plastic liner bag and cardboard divider are inserted into the bin. The divider creates evenly spaced slots to ensure the collected cups are neatly stacked. This serves to maximize the number of cups that will fit in the bin as well as discourage users from depositing anything but their used foam cups. The liner bag creates a protective barrier within the bin. Once full, the collection bin doubles as the carton used to return the cups for recycling.

To provide instruction to your patrons, as well as promote your recycling efforts, a poster is included for placement over the collection bin. Promotional table tents are also available.

4 Simple Steps to Recycle Foam Cups in Your Business

1. Order some Recycla-Pak "Kits" from your Dart distributor.
2. Set up the Recycla-Pak carton as a foam cup collection bin.
3. Place the instructional poster and table tents around your business to promote your foam cup recycling.
4. When full of empty foam cups, seal the bag and carton and provide it to UPS for shipment to the recycling facility. The carton comes labeled for shipping with the shipping cost prepaid.

Did you know . . .

- Programs like Recycla-Pak are unavailable for cups made of alternative materials, including paper cups. Paper cups are rarely, if ever, recycled due to the difficulty in separating the paper from its plastic coating.
- In many cases, even with the cost of recycling included, foam cups are very cost competitive with cups made of alternative materials.
- A typical foam cup requires about one third less energy to produce than a similar coated paper hot cup with a corrugated sleeve.
- A typical foam cup produces less than half the waste by weight than a similar coated paper cold cup.

By recycling foam cups, you make a difference for our environment that your customers will recognize and appreciate.

It's In Your Hands!
