

Dart RECYCLING Programs

CARE Program (www.dart.biz/care)

To make recycling foam foodservice products easier for our customers, Dart offers the CARE (Cups Are REcyclable) Program. The CARE Program helps large users of foam foodservice products separate the foam from other products, consolidate the collected material, and arrange to have it recycled. Recycled foam foodservice products can be reprocessed into building insulation, plastic lumber, and many other products.

The Dart densifier can compress 8,000 eight-ounce foam cups into a cylinder 15" tall and 15" in diameter.

Recycla-Pak (www.recycla-pak.com)

The Dart Recycla-Pak program is an easy way for any business to recycle their foam cups. Simply purchase a specially designed Recycla-Pak corrugated collection bin and you can start recycling foam cups.

The Recycla-Pak collection bin doubles as the shipping carton used to return the collected cups for recycling at a Dart or industry recycling facility. The bin will be shipped to you flat and, after a simple assembly, you are ready to begin collecting used foam cups for recycling. During use, a cardboard divider in the bin keeps the collected cups neatly stacked. A pre-printed shipping label attached to the bin allows for easy return of the cups for recycling, freight prepaid.

FOAM FACTS

FACT

More than 65 residential curbside recycling programs in California have stated they accept post-consumer foam foodservice containers on their website or send their single stream recyclables to a facility that sorts post-consumer foam foodservice containers for recycling (www.dart.biz/recycleCA).

FACT

Foam #6 foodservice containers constitute less than 1 percent, by both weight and volume, of our country's municipal solid waste.*

FACT

Foam #6 foodservice containers have excellent insulating properties and thus, do not require "double-cupping" or sleeves.

* United States Environmental Protection Agency Office of Resource Conservation and Recovery, *Municipal Solid Waste Generation, Recycling, and Disposal in the United States 2008*, November 2009.

The DART Story

The Dart story begins with a small machine shop in Mason, Michigan known as Dart Manufacturing Company. Established in 1937, this modest business prospered through the manufacture of such products as plastic key cases, steel tape measures, and identification tags for the armed services.

The Dart story begins with a small machine shop in Mason, Michigan known as Dart Manufacturing Company.

Subsequent experimentation with expandable polystyrene in the late 1950s led to a line of high quality insulated foam cups, and Dart Container Corporation was born.

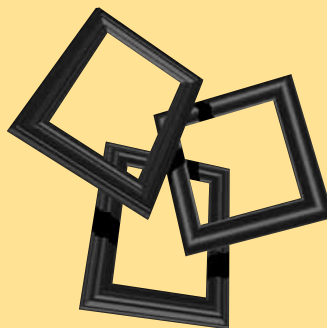

Fueled by decades of strong sales and the acquisition of Solo Cup Company in 2012, Dart is now the world leader in foam, paper, and plastic cup manufacturing. Today, Dart manufactures products in two California facilities strategically located near major markets in Northern and Southern California.

Dart strives to produce high-quality, cost-effective products in a manner sensitive to environmental concerns while providing tremendous value to the great state of California.

Dart RECYCLES!

California is home to Dart's newest wash and dry facility. Located in Corona, CA, the facility is able to process dirty, food contaminated foam into high quality post-consumer ingots which are converted into premium picture frames by another California company.

DART has two collection centers in **CALIFORNIA**:

DART CONTAINER, NORTHERN CALIFORNIA

1400 Victor Road
Lodi, CA 95240
209-333-8088

DART CONTAINER, SOUTHERN CALIFORNIA

150 South Maple Street
Corona, CA 92880
951-735-8115

California is home to Dart's newest wash and dry facility. Located in Corona, CA, the facility is able to process dirty, food contaminated foam.

California ECONOMIC Benefits

In California...

Dart employs **520** full-time employees.

Dart pays **\$20** million per year in payroll dollars.

Dart pays **\$27.4** million per year to California-based vendors.

Dart pays **\$1.2** million per year in state and local taxes.

California RECYCLES!

Every year, more California cities are choosing to accept foam in their curbside recycling program. For a complete list of cities, please go to www.dart.biz/recycleCA.

www.CaliHome4Foam.com

Dart's Municipal Foam Drop-Off Recycling Program helps cities across California recycle foam food containers and reduce waste at no cost to taxpayers.

How does the recycling program work?

Dart, at its own expense, will regularly pick up and haul away bagged foam #6 materials.

Dart will return the foam to a facility where it will be recycled.

All recycling takes place in California.
